# RONALD MIRANDA

## WEB DEVELOPER

## ABOUT ME

I consider myself a versatile web developer, who loves to write code for hours until a functionality is finished. With more than one and a half years of leveraging and learning Php, JavaScript, MySQL, React to build websites and interactive features that improve UX. As any programmer does, I enjoy to master languages or technologies to create amazing projects.

## PROJECTS

### EXPENCE HELPER

Budget tracker made using React, HTML, CSS. Includes responsive design, calculations and sorting.

### CORONAVIRUS STATS

Crownvirus app developer which uses API to learn how to make request to an API.

### FORM VALIDATION

Registration form made with React to validate different types of inputs and handle events.

### PROJECT REQUIREMENTS
